la lettre powysienne 1-32

Index

INTRODUCTION

Using a structure similar to that defined by Stephen Powys Marks in his 1992 booklet *Index to the Powys Review 1-26*, the first three sections of this index are an attempt to constitute the subject index for each of the three principal writers, these three sections being further subdivided as follows:

- A. the author's own writing reproduced in the *lettre*, as far as possible in date order;
- B. commentary and other references, illustrations etc. relating mainly to single published works, in order of first publication;
- C. other commentary and references, illustrations etc.;
- D. other photographs, drawings etc.

The fourth section is a general index picking up all other articles or illustrations, and the fifth section is a list of contributors.

The index is based on the English language version of the various articles, French versions thus being adjacent to the page references given. When an article exists in French only, it is however referenced directly. Editorials and Pêle-Mêle items are not indexed.

Reprints of *la lettre* n°1 use a later print technology different from that of the original 2001 issue. Reprint page references when different are indicated in square brackets.

oooooooooooooooooooo

Basé sur une structure semblable à celle définie par Stephen Powys Marks dans son livret *Index to the Powys Review 1-26* publié en 1992, cet index comprend d'abord trois sections tentant de constituer pour chacun des trois auteurs principaux un index des sujets, chacune de ces sections étant divisée en quatre parties comme suit:

- A. les propres textes de l'auteur reproduits dans *la lettre*, triés autant que possible par date;
- B. commentaires où autres références, illustrations etc. consacrés essentiellement à une œuvre particulière, par ordre de la première publication de celle-ci;
- C. autres commentaires ou références, illustrations etc.;
- D. autres photographies, dessins etc.

La quatrième section est un index général regroupant tous les autres articles et illustrations, et la cinquième section est une liste des contributeurs.

L'index est basé sur les versions en anglais des divers articles, les versions françaises étant adjacentes aux références de page correspondantes. Quand un article n'existe qu'en français il est cependant indexé directement. Les éditoriaux et les entrées dans Pêle-Mêle ne sont pas indexés.

La réimpression de *la lettre* n°1 a été réalisée avec un procédé d'impression différent de l'original. Les références de page correspondantes sont données entre crochets si elles diffèrent de ce fait.
